## What Does A Discord Member Bot Do?

A Discord member bot is a tool that helps you increase the number of people in your server. These bots work by adding users who are interested in joining new communities.

2. **You provide your server link:** The bot needs to know where to add people.
3. **You select the number of members:** Choose how many new members you want.

These services can be a great way to quickly populate your server and make it look more active. A larger member count can attract even more people organically.
