What Does A Instagram Likes Bot Do?

An Instagram likes bot is a tool designed to automatically increase the number of likes on your posts.

Here's how it generally works:

1. **You provide access:** You typically connect the bot to your Instagram account.

2. **Targeting:** You tell the bot what kind of posts to like (using hashtags or accounts).
3. **Automatic liking:** The bot then automatically likes posts that match your criteria.
4. **Reciprocal likes:** The idea is that other users will notice your likes and check out your profile, potentially liking your posts in return.

This can help give your profile a quick boost in visibility. It's a simple way to get more eyes on your content.
